

## UM 3-Minute Thesis Competition (UM3MT)

**10 March 2017.** Can you imagine condensing a 100,000-words thesis into a three-mins presentation? UM3MT challenges graduate students to consolidate their research & presenting in front of non-specialist audience, in three minutes! It's part of the University's strategy in promoting graduate students and their research as well as connecting with community. Assoc. Prof. Dr. Andri Andriyana was the Chairman of the Faculty level competition.

Dr. Ang and Dr. Nazatul also served as panel of jury for UM3MT

## CAM Photo Session

Line of CAM members in a group photo.

**29 March 2017.** It is not easy to get everyone together in a group at the same time and place. We are very pleased that almost all members were able to spare some time for the photo session at the Faculty's lobby. The latest group and individual photos of CAM members will be updated soon!

## 'Teh Tarik' Session

**29 March 2017.** 'Teh Tarik' Session is a new CAM activity to provide a platform to share ideas among CAM members. The first edition of Teh Tarik Session was chaired by Dr. Shahira Liza and Dr. Suriani, the newest CAM members. This session aimed to initiate positive and motivating discussion that may lead to new collaborations. We really enjoyed the teh tarik while listening to the talk. Hope to hear talks from other members soon.

CAM members listening to Dr. Shahira talking about her research work.

## Future Collaboration with MISC

From left, A/P Dr. Henk Metselaar, Prof. Dr. A.S.M.A. Haseeb, Dr. Nor Ishida and Dr. Nazatul with the representative from MISC.

**31 March 2017.** Four members of CAM went to visit the Malaysia International Shipping Corporation (MISC) recently. We want to exchange a non-disclosure agreement and to explore the possibilities for cooperation. MISC Berhad was incorporated in 1968 as Malaysia International Shipping Corporation Berhad. It is the leading international shipping line of Malaysia which have specialist in Energy Transportation. Hoping to engage with them and getting a big project for the research centre soon.
