NEGRI SEMBILAN

ADMINISTRATION REPORT

FOR THE YEAR 1920.

I.—FINANCIAL.

1. The revenue for 1920 amounted to \$5,942,205 as compared with \$7,111,538 in 1919.
2. The expenditure was \$7,635,239 on an estimate of \$8,329,070.
3. On 1st January, 1921, the State's assets were \$7,963,373 and its liabilities \$365,250.

II.—STATE COUNCIL.

4. The State Council met on four occasions during the year, His Highness the Yang di Pertuan Besar presiding at all the meetings.

Three death-sentences came before the Council, two were confirmed and one commuted to penal servitude for life.

Two areas of land were declared Malay reservations, one in the mukim of Johol, Kuala Pilah district, and the other in the mukim of Lenggeng, Seremban district.

III.—TRADE.

5. The imports for 1920 amounted to \$13,403,573 as compared with \$13,569,224 in 1919.

In many cases there is a decrease in the quantity imported but a considerable increase in the value.

The following is a summary of the import returns:

	1919.		1920.
A.—Live Animals, Food, Drink and Narcotics	\$9,158,087	...	\$7,233,853
B.—Raw Materials	1,702,390	...	2,012,730
C.—Manufactured Articles	2,706,347	...	4,156,890
D.—Bullion and Specie	2,400	...	100

6. The exports for 1920 amounted to \$38,604,887 as compared with \$42,290,465 in 1919.

The following is a summary of export returns:

	1919.		1920.
A.—Live Animals, Food, Drink and Narcotics	\$ 72,205	...	\$ 126,868
B.—Raw Materials	41,925,638	...	38,203,968
C.—Manufactured Articles	291,490	...	273,742
D.—Bullion and Specie	1,132	...	309

IV.—MARINE.

7. The number and tonnage of steam vessels and native crafts cleared from Negri Sembilan ports for the last three years were as follows:

	1918.		1919.		1920.	
	Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
STEAM VESSELS.						
Port Dickson	229	75,368	344	102,275	216	72,662
Kuala Lukut	23	989	24	1,032	23	1,058
Pengkalan Kempas	92	2,647	101	2,999	94	2,780
Total ...	344	79,004	469	106,306	333	76,500
NATIVE CRAFTS.						
Port Dickson	787	15,246	631	16,229	576	15,140
Kuala Lukut	78	902	165	1,636	91	2,411
Pengkalan Kempas	130	2,767	85	2,239	68	1,237
Pasir Panjang	134	1,720	51	1,355	17	659
Total ...	1,129	20,635	932	21,459	752	19,447

V.—LAND AND AGRICULTURE.

8. The total area of land alienated for agriculture is 450,569 acres including a comparatively small area of building land.

Of this area, 259,773 acres are under rubber and 30,213 acres under padi.

9. The number of transactions in local Land Offices decreased from 9,655 in 1919 to 7,146 in 1920. The value of the land continued to increase.

10. The padi harvest in Kuala Pilah was seriously injured by a prolonged drought with the result that the average yield per acre fell from 195 gantangs in 1919 to 118 gantangs in 1920.

In other districts an average yield of, approximately, 200 gantangs to the acre was obtained.

11. The various diseases to which rubber and coconuts are liable have received the careful attention of the Agricultural Department. One thousand one hundred and ninety-nine notices have been issued and 147 prosecutions instituted.

The crisis through which the rubber industry is passing will considerably increase the difficulties of the department. Some of the smaller holdings will probably be abandoned and it will be difficult to enforce preventive measures against an owner whose source of income has disappeared.

The spread of disease is one of the most serious dangers arising from the fall in the price of rubber.

12. The District Officer, Jelebu, gives comparative figures for the output of rubber from large and small holdings in his district. On estates over 100 acres, 2,790 acres planted with rubber in bearing produced 962,685 pounds of rubber giving an average yield of 345 pounds per acre per annum. On holdings under 100 acres, 1,820 acres planted with rubber in bearing produced 237,811 pounds of rubber giving an average yield of 130 pounds per acre per annum.

Most of the native plantations are suffering from the disadvantages of close planting.

VI.—MINES.

13. The output of tin reduced to a metallic basis is estimated at 11,710 pikuls as compared with 14,761 pikuls in 1919.

The output of wolfram amounted to 1,173 pikuls.

14. At the December census the labour force showed 2,240 persons as compared with 2,208 in 1919 and 5,842 in 1918. There were 2,197 Chinese and 25 Malays.

15. The labour force was distributed as follows:

Open-cast and surface mines	1,183
Underground	233
Hydraulic and lampan	719
Bucket dredges	105

There were 527 dulang washers, of whom 99 were Malays.

16. The total horse-power of steam hydraulic and gas engines amounted to 1,372.

17. The area alienated for tin mining at the end of the year was 15,619 acres. There are only five mines in the State employing over 50 coolies. The rest of the mining is carried on by small parties engaged in temporary work.

18. There were six deaths due to accidents, giving a death-rate of 2.67 per thousand.

19. The decline in the mining industry during the last few years continued in 1920. The Assistant Warden reports that the outstanding feature of 1920 is the interest taken in ground suitable for dredging. When the areas now selected for dredging are worked there should be five dredges in the immediate vicinity of Seremban.

VII.—REVENUE SURVEYS.

20. The total area surveyed was 52,329 acres as compared with 69,544 acres in 1919.

The cost per acre for agriculture, mining and small holding applications was \$2.82, \$2.55 and \$8.74, respectively, as compared with \$2.08, \$4.66 and \$6.53 in 1919.

The increase in cost during the last two years is attributed to the scattered nature of the work and the increase in wages.

Surveys of forest reserves at Gunong Angsi and South Gemas were completed.

21. The number of documents prepared decreased from 6,213 in 1919 to 3,425 in 1920.

At the beginning of the year there were requisitions for 1,962 lots unsatisfied, of which 176 awaited survey. At the end of the year there were 1,771, of which 45 awaited survey and 314 awaited settlement.

22. The expenditure amounted to \$288,489 as compared with \$240,355 in 1919. The increase is chiefly due to temporary allowances.

The revenue was \$18,891 as compared with \$42,119 in 1919.

VIII.—REGISTRY OF TITLES.

23. There were 3,655 transactions relating to grants for agricultural and town lands as compared with 4,268 in 1919.

Charges decreased from 993 to 929 and discharges from 680 to 638.

Sixty-nine grants and 192 certificates of title were issued.

IX.—FORESTS.

24. The reserved forests cover an area of 403 square miles equal to 15.8 per cent. of the area of the State.

Repairs to boundaries were executed over a distance of 484 miles at a cost of \$3 per mile.

25. The revenue amounted to \$111,249 as compared with \$100,774 in 1919.

The chief items were:

	1919.	1920.
Timber	\$65,812	\$73,647
Firewood and charcoal	22,878	26,149

X.—FISHERIES.

26. The fishing industry is very small and steadily decreases in value owing to the fact that the coast is not well suited for fishing stakes.

Licences were issued for 126 fishing boats, 154 drift nets, 28 seine nets, 35 inshore and 4 offshore fishing stakes.

XI.—PUBLIC WORKS.

27. The provision for State public works was \$5,410,942. Of this sum, \$1,950,506 only were expended. Many works were postponed owing to the fact that contractors, prices were far in excess of the estimated cost.

In addition a sum of \$138,714 was spent on personal emoluments and other charges.

28. In common with the other States Negri Sembilan has suffered severely from the shortage of house accommodation for European officers and clerks. The rise in the cost of house building has been phenomenal. Quarters which in 1912 cost \$15,000 can now only be built at a cost of \$48,000. There are, however, signs that costs are decreasing.

29. The chief new works in course of construction during the year were:

- (1) Quarters for a Judicial Commissioner;
- (2) A District Hospital at Batang Malaka;
- (3) Extension of Service Reservoir, Seremban;
- (4) Water Supply, Gemas.

30. Under river conservancy a small sum was spent on clearing streams to prevent road flooding. The Linggi, the principal river of the State, is gradually silting up, and considerable expenditure will be necessary.

31. Irrigation works for padi land at Kampong Sega, Pantai and Batu Kikir were in course of construction.

32. New roads in hand are:

- (1) Tampin to Gemas—30 miles;
- (2) Joining the Coast Road to the Rantau Road—13 miles;
- (3) Siliau to Port Dickson—3 miles;
- (4) Bukit Palong to Sepang with a branch road to the Coast—22 miles.

33. The roads round Seremban are not in good condition owing to shortage of labour and difficulty of obtaining road metal. A new quarry has been opened on Temiang Estate from which excellent metal is being obtained.

34. The department has been seriously handicapped by shortage of staff and increase in the cost of labour and material.

XII.—EDUCATION.

35. The number of schools is as follows:

		Boys.							Government.	Aided.
English	2	...	2
Malay	68	...	—
Tamil	1	...	11
		GIRLS.								
English	—	...	1
Malay	4	...	—

36. The average enrolment of boys was 4,908 and of girls 243. The average attendance was 90 per cent. for boys and 86 per cent. for girls.

37. At the English schools the nationalities were as follows: Europeans and Eurasians, 126; Malays, 146; Chinese, 392; Indians and others, 303.

Forty-nine pupils were presented in Standard VII: 20 second class certificates were obtained, the other 29 candidates failed to pass.

The new Government English School building at Port Dickson was opened in February, 1921.

38. The Inspector of Schools reports:

"I received numerous applications from Malays for admission to the English schools. The Malays of Negri Sembilan appear to be very anxious to qualify for positions in their own country which up to the present have been filled by outsiders."

Well educated Malays will be welcomed in the clerical service.

Basket work was taught at eleven schools by teachers trained at the Malacca College.

39. The total expenditure of the department, exclusive of buildings, was \$137,740.

XIII.—MEDICAL.

(I).—PUBLIC HEALTH.

40. The births and deaths for the last three years are as follows:

		1918.			1919.			1920.
Births	...	4,117	...	4,190	...	4,809		
Deaths	...	11,600	...	6,178	...	6,792		

On an assumed population of 160,096 (Malays 80,954, Chinese 47,764, Indians 29,378) the birth-rate and death-rate are 30.04 and 42.42 per mille.

The rates calculated on the assumed populations of 1918 and 1919 were:

				1918.		1919.
Birth-rate	26.86	...	26.74
Death-rate	75.68	...	39.43

The birth and death rates for Malays are 38.23 and 30.14, for Chinese 22.92 and 51.67, and for Indians 18.96 and 61.23.

41. There were only two cases of small-pox and no cases of plague or cholera. One thousand six hundred and ninety-one cases of influenza with 160 deaths were reported.

A sum of \$62,000 was spent on anti-malarial work for oiling draining ravines and filling in swamps. Gemas, where considerable railway work is in progress, has been a source of much anxiety.

(II).—MEDICAL INSTITUTIONS.

42. The State has hospitals in six districts with accommodation for 1,026 patients.

During the year, 17,671 indoor patients were treated with 1,561 deaths giving a death-rate of 8.83 as compared with 9.9 in 1919. Four hundred and three deaths occurred within 48 hours of admission.

43. The total admissions for malaria were 5,631 as compared with 4,378 in 1919 and the deaths 261 as compared with 221. The total deaths from malaria throughout the State were 2,912.

44. Beri-beri cases have decreased from 1,416 in 1918 and 945 in 1919 to 234 in 1920. This remarkable decrease is one of the benefits to be set to the credit of Government control of rice, and is due to the fact that polished rice was not obtainable.

45. The women's hospital at Kuala Pilah in charge of a lady doctor was well patronized. Malay women are showing increased confidence in the efficacy of European treatment.

46. Dysentery cases decreased from 960 to 821 and ankylostomiasis cases from 611 to 484.

47. Forty-three thousand nine hundred and ninety out-patients were treated as compared with 37,993 in 1919.

48. Twenty-four thousand four hundred and twenty-nine coolies were admitted to the 45 estate hospitals. The deaths numbered 883, giving a death-rate of 35.4 per mille. There were 11,948 malaria admissions with 210 deaths.

(III).—VETERINARY.

49. There were 780 cases of foot-and-mouth disease of a mild type with three deaths of old and debilitated animals.

Eight cattle suffering from surra were destroyed.

Seven pigs in an isolated sty affected with swine fever were destroyed and the spread of the disease was prevented.

50. There was a serious outbreak of rinderpest; 86 cattle and 34 buffaloes were infected, of which 56 cattle and all the buffaloes died. Two hundred and forty-six cattle were inoculated with anti-rinderpest serum. Of the inoculated animals, 56 developed disease and 38 died. Many of them were young calves or debilitated animals.

XIV.—POLICE AND CRIME.

51. The force was considerably under the sanctioned strength throughout the year. Offences by Asiatic members of the force numbered 536 as compared with an average of 363 for the last five years.

52. Serious crime is tabulated as follows:

	1920.	1919.	Average for five years.
Murder and homicide	22	21	13
Gang-robbery	11	15	9
Robbery	27	30	19
House-breaking	27	23	16
Theft (serious)	58	47	32

The Chief Police Officer reports a noticeable increase in robberies and thefts during November and December due to the fall in the price of rubber and tin.

53. Fifty-one persons, of whom 48 were Chinese, were banished during the year as compared with 68 in 1919. Thirty-seven were dangerous and habitual criminals and 11 members of unlawful societies.

XV.—PRISONS.

54. The daily averages at the Seremban Gaol were :

Civil prison	26
Short sentence	133
Long sentence awaiting transfer	8
							Total	167

The daily average in hospital was 2.2. There were only three deaths as compared with 14 in 1919.

55. The net cost per head per annum increased from \$217 in 1919 to \$360 in 1920.

56. Four hundred and fourteen cubic yards of metal were broken. Since September the stone quarry at Temiang, about a mile from the gaol, has been worked with prison labour and a considerable quantity of good road metal has been quarried and broken in a crusher supplied by the Public Works Department.

The vegetable garden was maintained throughout the year.

XVI.—LABOUR.

57. The number of labourers was as follows :

	31-12-1920.	31-12-1919.
Estates	44,843	54,110
Mines	2,240	2,208
Government	4,692	3,822
Total	51,775	60,140

The decrease in the labour force is confined to Chinese, whose numbers were reduced from 34,188 to 22,254. Many of the estates have replaced Chinese by Tamil labour.

XVII.—GENERAL.

58. His Excellency the High Commissioner visited the State on April 6th and 7th. Official visits were exchanged with His Highness the Yang di Pertuan Besar and the Undang and addresses of welcome were presented to His Excellency by the various communities.

59. The triennial mengadap ceremony, which had been in abeyance during the war, was held at Sri Menanti on September 6th for the first time since 1912. The ceremony was attended by the High Commissioner, Acting Chief Secretary and many other officials who were afterwards entertained by His Highness.

60. Rice control in the Seremban district was undertaken by the Chairman, Sanitary Board. The whole district was rationed, permits to purchase being issued to every one. The general public, particularly the poorer classes, were quick to recognize the benefits to be derived from the system. Complaints regarding the difficulty of obtaining rice ceased when the individual was rationed. Special shops for Malays were opened throughout the district and were found most satisfactory.

61. As a very necessary insurance against a possible failure in the rice supply the policy of compulsory growing of foodstuffs was continued. About the middle of the year, when it became clear that the rice supply would be sufficient, compulsion was abolished. The planting community loyally complied with the requirements of the Government, but with the exception of sweet potatoes of which there was a glut, the planting of foodstuffs was not a success. The labour force evinced a strong aversion to the use of food substitutes for rice.

62. Mr. J. R. O. Aldworth, who was appointed Resident of Negri Sembilan on 3rd September, 1919, retired from the service on 22nd May, 1920. Mr. Oliver Marks has been appointed to succeed him.

SEREMBAN,
5th April, 1921.

A. B. VOULES,
Acting British Resident, Negri Sembilan.

APPENDIX A.

I.—Account of Cash Receipts and Payments together with Below the Line Account for the year 1920.

Heads of Revenue.		Amount.	Heads of Expenditure.		Amount.
