

FEDERATED MALAY STATES.

REPORT ON THE POSTS AND TELEGRAPHS DEPARTMENT FOR THE YEAR 1913.

CORRESPONDENCE.

1. The approximate number of letters, post-cards, packets and parcels posted and delivered during the year was 17,700,408, an increase of 2,180,758, or 14 per cent., over the figures for 1912. The increase was spread over all the States as will be seen from the comparative statement in appendix I.

REGISTERED ARTICLES.

2. The number of registered articles posted was 320,606, and 296,030 were delivered. The letters posted show an increase of 45,682 and those delivered an increase of 50,996 as compared with the figures for 1912.

PARCELS.

3. The parcels posted numbered 50,258 and those delivered 101,218, being increases of 16,142 and 22,152, respectively, as compared with 1912.

CASH-ON-DELIVERY PACKETS.

4. There was again a very large increase in the number of cash-on-delivery packets dealt with during the year. Three thousand three hundred and fourteen packets bearing trade charges to the value of \$27,589 were posted and 7,275 packets with trade charges amounting to \$61,133 were delivered. These figures show increases of 730 and 3,413, respectively, in the number posted and delivered, and \$5,599 and \$15,074, respectively, in the amount of the trade charges.

INSURANCE.

5. During the year, 2,900 articles insured for \$548,341 were posted and 6,081 articles insured for \$532,450 were delivered. Articles posted show an increase of 658 in number and \$201,179 in value, whilst those delivered show increases of 1,045 and \$129,041 as compared with the figures for 1912.

DEAD LETTERS.

6. In the Dead Letter Office 135,666 articles, including 756 registered articles, were dealt with, of which 84,430 were either returned to the sender or to the country of origin. These figures include 69,231 bearing letters taxed to the extent of \$4,138.

7. In the letters opened, local coin and notes to the amount of \$253.02, cheques and drafts to the face value of \$3,234.21, British postal orders to the value of £24 5s., and foreign currency notes to the estimated value of \$99.14 were found.

8. Forty-six parcels were returned to the Dead Letter Office as "abandoned" and the contents have been sold or destroyed.

9. Two hundred and two letters bearing no address were posted.

POSTAL ORDERS.

10. British postal orders are still popular for making small remittances, 96,328 orders valued at \$594,154 being issued and 2,030 valued at \$11,389 paid. These figures show increases of \$112,650 and \$1,673, respectively, as compared with the value for 1912. The revenue from these orders, including \$2,737 gained on exchange, was \$8,579 as against a revenue of \$6,772 in 1912.

11. Straits Settlements postal orders to the value of \$657 were also paid.

MONEY ORDERS.

12. Money orders to the value of \$4,845,157 were issued, and those paid amounted to \$1,107,311. As compared with 1912, these figures show increases of \$692,610 and \$202,504, respectively. The number of those issued increased by 15,519 and those paid by 6,992.

13. Three thousand one hundred and seventy-nine telegraphic money orders amounting to \$163,269 were issued, being an increase of 891 in number and \$60,498 in value.

14. The revenue paid in as commission on money orders amounted to \$60,665, an increase of \$7,818 as compared with 1912.

15. Money order offices were opened at Batu Caves, Semenyih, Labu, Pekan, Kuantan, Bruas and Kroh, making the total number of money order offices 77.

16. In appendix II will be found the number and value of the money orders issued on various countries, and of those received from them for payment in the Federated Malay States. Appendix III contains a comparative statement showing the value of the money orders issued and paid in the different States in 1912 and 1913.

SAVINGS BANK.

17. The number of depositors in the savings bank has increased by 931 during the year, the total number on the 31st December being 8,036.

18. The amount to the credit of depositors has increased from \$789,780 to \$842,218, an increase of \$52,438 since the beginning of the year. The average amount to the credit of each depositor has decreased from \$111 to \$104.

19. The amount of deposits and withdrawals in each State will be found in appendix IV.

20. From the working account in appendix V there would appear to be a profit of \$7,552, but from the note attached to that account it will be seen that, if the depreciation on sterling securities is taken into account, there was a loss of \$10,521.

21. An investment account is given in appendix VI, showing the purchases and sales during the year and the total investments on the 31st December. The sterling securities are shown at cost price although the depreciation on 31st December amounted to \$18,074.17. The market is, however, rising and it was not considered necessary to write off any portion of the depreciation until normal conditions are restored. There is practically no market in municipal debentures and it is therefore impossible to say what was the actual value of the debentures held on the 31st December. They are, however, probably worth more than the price at which they are taken in these accounts and this may be set off against the depreciation in the sterling securities. On the Southern Nigerian stock purchased in 1912 the depreciation amounted to \$13,024. Had the Crown Agents not been compelled to invest that money in Crown Colony stocks a better return could have been obtained and the depreciation would have been \$4,378 less.

22. Appendix VII contains a statement of assets and liabilities. The balance to the credit of savings bank on 31st December was \$35,202. Against this must, however, be set any depreciation on investments which it may ultimately be considered necessary to write off.

TELEGRAPHS AND TELEPHONES.

23. During the year, 422,401 telegrams were despatched and 419,066 were received for delivery. As compared with the previous year there is an increase of 50,418 in the number despatched and 38,273 in the number delivered.

24. The revenue derived from telegraphs was \$150,834, of which \$113,747 are included in the stamp sales shown in appendix X. The figures show an increase of \$15,782 over those for 1912.

25. The value of the telegrams sent free of charge for other Government departments was \$57,000.

26. The total number of subscribers to the telephone exchanges on the 31st December was 993, an increase of 164. In addition there were 304 extension circuits, extension bells and private lines maintained by the department.

27. In order to meet the wishes of the planting community the railway goods sheds at Seremban, Kajang and Klang were connected to the telephone exchanges at these places, a fee of 10 cents being collected for each conversation over these circuits. The fees collected were \$14.50, \$30 and \$21.60, respectively, whilst the ordinary subscription rates for the time these lines were in use would have been \$40, \$45 and \$40.

28. The revenue derived from telephones was \$136,736, this being an increase of \$33,322 on the figures for the preceding year.

29. A statement showing the length of telegraph and telephone lines, etc., in each of the years 1909-1913, inclusive, is given in appendix VIII.

30. On the 31st December, 1913, there were 2,009 miles of telegraph and telephone lines and 7,822 miles of overhead wire in the Federated Malay States, of which 5,473 miles were telephone wires. In addition, there were 12½ miles of underground telephone cables

containing 1,074 miles of wire, single line. These figures include 700 miles of telephone wire maintained by the department for the police, but do not include the wires maintained by the Railway Department for their own use. The Posts and Telegraphs Department also owns 242 miles of telegraph wire in Johore.

31. New telegraph lines from Kuala Lumpur to Petaling and from Seremban to Labu and Sepang Road were constructed during the year and the Kuantan-Pekan line was completed. Other lines were commenced but not completed owing to the late arrival of material. The work of reconstructing the telephone exchanges at Ipoh, Taiping, Batu Gajah, Gopeng, Klang, Kuala Selangor and Port Swettenham was in hand but only Port Swettenham was completed. It was not possible, owing to shortage of staff and the late receipt of stores, to proceed with the other reconstruction authorized. The new exchange at Port Dickson was practically completed but could not be opened until the 25th January this year. A trunk line was erected between Port Dickson and Seremban.

32. On the 1st August we received authority to recruit such extra staff as was considered necessary for carrying out generally the improvements to the telegraph and telephone systems recommended by Mr. Preece. We have advertised locally and in India and Ceylon but with very poor results, and it is evident that a very considerable time must elapse before the subordinate staff can be brought up to its proper strength.

33. The cost of maintenance was \$134,758 and a further sum of \$576,411 was spent on construction and reconstruction, of which \$421,429 were spent on telephone construction. A very large proportion of this special expenditure merely represents the cost of material, which has not yet been used for the reasons given above.

POST OFFICES.

34. Post offices have been opened at Bruas, Kroh, Batu Caves, Semenyih, Labu and Sepang Road, the allowance office at Batu Caves being closed. Arrangements have been made for station masters or other persons to keep a supply of postage stamps, accept letters for despatch and deliver letters to callers at the following places: Kuang, Bahu, Batang Malaka, Pedas, Kuala Krau, Kuantan Road, Kuala Rompin and Triang. There are now 82 post offices at which officers of the Postal Department are employed and 37 places at which postal business is transacted by station masters and others.

35. A new office was completed and occupied at Rantau.

REVENUE.

36. The net revenue collected by the department was \$679,861, being \$57,361 more than estimated and \$67,443 more than that collected in 1912. Stamps to the value of \$370,130 were sold and credited to State revenues.

37. In appendix IX the amounts collected are shown under the various heads of revenue and it will be seen that there is an increase under each head.

38. In appendix X will be found the number of each denomination of stamps issued in 1912 and 1913.

39. The value of services performed free of charge for other Government departments—such as the transmission of correspondence and telegrams on official business and the maintenance of police telephone lines—is estimated at \$95,000.

EXPENDITURE.

40. The expenditure amounted to \$1,275,457: annually recurrent expenditure being responsible for \$681,085 and special expenditure for \$594,372. The expenditure shows an increase of \$447,345 as compared with 1912 and is \$235,837 more than estimated. The increase over the estimate is due to the expenditure in 1913 of \$266,386 provided but not spent in 1912.

MISCELLANEOUS.

41. One hundred and ninety licences to collect letters for transmission to China were issued: 16 more than in 1912.

42. The Ulu Pahang mails, except those for Bentong, are now being sent *via* Kuala Kubu and the Gap again but the Railway Department no longer provides a connecting bus to Bentong and the Bentong mails are being sent direct from Kuala Lumpur *via* Ginting Sempah.

43. Advantage was taken of the motor launch service on the Pahang river to arrange for a bi-weekly mail service to and from Pekan.

44. A motor service between Klang and Banting was substituted for the bullock bus service between Klang and Jugra.

PERSONNEL.

45. Mr. W. H. Green, Assistant Accountant, returned from leave on the 20th May and Mr. R. R. Bullmore, Assistant Superintendent, on the 9th October.

46. Mr. W. A. White, Accountant, was on leave from the 2nd June to the 5th December and Mr. W. H. Green acted as Accountant.

47. Mr. H. J. Harris, who was appointed to fill the vacancy for an Assistant Superintendent caused by the promotion of Mr. S. G. Hobson, arrived and took up duty on the 15th July; and Mr. Blackwell, who was appointed to fill an additional Assistant Suprintendentship, took up duty on the 7th December.

48. Mr. G. O. Evans, an additional Assistant Telegraph Engineer, took up duty on the 31st December.

49. Thirty one clerks left the department during the year for various reasons, and to fill the vacancies thus created and the additional appointments sanctioned 61 new clerks were appointed. The supply of locally educated candidates was not sufficient to meet this demand.

C. H. ALLIN,

Director of Posts and Telegraphs, F.M.S.
